## SPRINT (NO CODES) AND THE HDR CATEGORY

### **Complementary Instructions to the No-Codes Sprint.**

Physically undemanding sprint that is built on the basis of the **micro-o**.

On track there are some map tricky set-ups prepared and with those each competitor will have to quickly come to terms.

The map shall have the sprint track duly printed out. However, **control descriptions will have no codes.**

On the spot of a control point there will mostly be several control flags posted out.

Only based on **accurate map reading and due assessment of control description** it will be possible to properly decide, which control is the correct one.

At same object there might be **one or more control flags placed.**

The non-pointed objects shall have corresponding center-circle placement, same in real and on map.

**Wrong-punched** controls shall be penalized by a **1-minute penalty.**

**If more controls** than those defined on map have been punched, for each such extra punch there is a **1-minute penalty.**

On condition a competitor has more than one control punched than defined for his course, he shall be penalized for each additional control by 1 minute. This means it will not be possible to perform a corrective punch, there is only one attempt to punch correct control.

**Categories HDR, DH10N utilize orange ribbons that lead on roads and paths. The course lines lead through clusters of controls so that even the small competitor would have to decide, according to the control descriptions, which out of three controls is his.**

Manual corrective punching to the R1, R2, and R3 fields on map is acknowledged only in case of proven non-functioning of the SI unit.

### **Specific Instructions to HDR Category:**

This category is **not a competing category**, shall not be awarded, no order shall be announced either (achieved time in particular stage shall be provided only on the paper slip printed after the SI card reading). The category is intended for children to learn basics of orienteering. Each small participant who passes the finish line shall be **“sweet-awarded”** directly at finish.

#### **What may children expect on their track?**

A simple track that is easily manageable on roads and paths.

After each decision making at crossroads or forking, shortly down the road, they will find a confirmation – either a **smiling face** (circled emoticon mark) in case of **proper decision** or a **frowning face** in case of **bad decision** (the marks shall not be visible directly from the spots from which they have to decide – choose their route).

On condition a child meets the frowning face on his/her course it means he/she opted for a wrong route choice, must return back and choose some other. As we do not assume they would be going further beyond and returning on the same road on which they had previously been approaching the control, please note, that there will be no frowning faces in such opposite direction.

Between two control points there may be more route choices. In this case each proper route choice shall be marked with smiling faces.

More difficult parts may be marked by several smiling faces in a row in order the child feels comfortable and manages such part better.

See also the map illustrating how smiling or frowning faces appear and are located. The map is to be found on the registration envelope.
